

For Earth & Humanity

*...[we] just have to keep working away [at Disclosure] and hope that someday [we] get a critical mass, and [the public] will say, in one way or another, 'Mr. President or Mr. Prime Minister we want the truth and we want it now because it affects our lives.'*¹ —Paul Hellyer, Canadian Secretary of Defense (Rt)

OPEN LETTER

Professional Research, Science, Tech and Investigation Community

Dear experts and professionals, whether spaceflight engineers, astrophysicists, scientists, astronomers, propulsion and superluminal flight physicists, MDs and PhDs, aeronautical engineers, astronauts, aerodynamicists, space psychologist, optical physicists, tele-robotics and reverse-technology engineers, Ufologists and authors, and many others concerned with Disclosure of the ET/EFO²/Cosmic Life Reality:

I am organizing the **Cosmic Life Exposé™** to **DISCLOSE this reality** to our planet—we are going on LIVE TV across 70+ countries to reach up to 1 billion viewers!

Please resist any emotional recoil if you are in mainstream academia, science and other traditional areas where you are not privileged to access the facts of this reality. Regardless your personal beliefs, this project should help you, your industry, humanity and Earth.

I will provide more CLE details in a moment but first let me give you a little insight on my background and my motivation for the CLE.

A Brief Backgrounder

Most of you do not know me but I am, among other things, a cosmic life researcher of 30 years. I grew up in the building industry and successfully owned and managed several companies only to end up working for a major NYSE REIT advising its officers. I'm also an inventor and sent my first videogame design to Mattel at age 11—they laughed at me but somebody, 15 years later, took a lesser design and made millions with it. I made my first 8mm film about the same age and applied for my first patent by age 14. I eventually left the building industry to pursue my passion as a producer (working below the radar of studio head Charlie Arneson) at Fox

¹ Quote from 2005 keynote speech at the University of Calgary by ex-Defense Secretary (during the 1960s) Paul Hellyer delivered at the Disclosure Canada Tour. See: Gander, Kashmira, "Former Canadian defence secretary Paul Hellyer calls on governments to reveal UFO information," Independent (April 20, 2015). At: <http://www.independent.co.uk/news/world/americas/former-canadian-defence-secretary-paul-hellyer-calls-on-governments-to-reveal-ufo-information-10190024.html> See ALSO: <https://www.youtube.com/watch?v=Qt1WVeyMqdo>

² EFO = Extraterrestrial Flying Object. Note: EFO is substituted for UFO to clarify intended meanings of original sources (UFO is considered synonymous with EFO by the general public, not governments or some disciplines).

Studios Baja.³ When Fox sold the studio and kicked everyone off the lot, I lost everything and had to rebuild. I went on to document and write the “Double Top Secret” trilogy and I am in the process of producing the first installment, “DTS: Blackout,” an \$80M budgeted drama based on actual “secret” US military investigations and sightings between WWII and 1948.

Along the way, I also consulted with the failing horseracing industry and ended up redesigning it from the ground-up toward tripling revenues, profits, and longevity using revolutionary concepts like AERSA and the landmark \$200M TV-Transmedia series/season “Winner’s Universe” (WU).⁴ WU required many new approaches and innovative tools, including cultural bias marketing.⁵ I also innovated the world’s first ever superconvergence studio design, a \$3B system with a unique set of tools and inventions never before seen or used by Hollywood for making all forms of content at a fraction of today’s costs. The system was so powerful it could conceive a new TV show today and in 45 days have it tested, aired and turning a profit— unheard of by New York network standards.⁶ In short, I am a creative problem solver and idea generator who has worked across dozens of industries so I see things others do not. It is that unique mix of talent, experience and skills that enabled me to solve the complex CLE problem!

Sprouting the Seeds of the 22nd Century

After drafting the DTS film stories and the first screenplay I started to prepare the producer’s package. I soon realized the first film was essentially a “Soft Disclosure” event—we were going to be revealing the actual secret history of the UFO and how the military and White House dealt with it. I then realized we needed some sort of proper Disclosure event, not just a film—a companion project that offered the stunning facts, cases, evidence and more. After all, who doesn’t want to know the true history of the “flying saucer” and why the government made it “top secret”—that is fun entertainment but it needed an educational counter-part to go with it, if Disclosure was to succeed. Hence the conceptual seeds of the CLE were born.

As I began to design the CLE an incredible number of problems came to the surface. The most troublesome was finding a way to overcome 70-years of built-in culture-based ridicule that surrounds the entire topic of ET, “flying saucers,” UFOs and the like. As I mentioned, I had become an expert on “cultural bias marketing” (CBM) during my work on “Winner’s Universe” and realized it was the only tool that could help me overcome such a problem.⁷

In a nutshell, CBM is used to diminish or destroy a cultural taboo or preconception so that the traditional marketer’s messaging will once again work. For example, assume a tribe hates *liver and onions* because of a built-in cultural taboo (say 300 years ago people of the tribe ate contaminated liver and most died and hence the tribe’s beliefs, superstition, and cultural

³ I was aided by then Kwikrig owners, Harry Heeks and David Skinner under the production company name of Firelight Films.

⁴ The project was quashed by Creatoran’s Consulting client The Jockey Club®, presumably, in part, for lack of funding. I was never able to present AERSA or the other solution proposals to horseracing, hence the industry is continuing its needless decline.

⁵ Although I have a graduate degree in business and marketing, I was forced become an expert in, cultural bias marketing (also known as Cultural Engineering).

⁶ I didn’t have \$3B laying around so I set the project aside.

⁷ Cultural bias marketing is little-known discipline. There are about 12 people on the planet who know what it is or how to apply it because it is so seldom used commercially.

patterns arose). Until a cultural bias marketing expert removes the old tribal taboo, no amount of sales discounts, trial offers, and other forms of traditional marketing are ever going to work on the tribe—they simply cannot hear or assimilate the marketing message because they are “closed off” from the concept altogether—it’s taboo. CBM seeks to repair this problem.

In the case of the CLE design, I also faced many obstacles across mainstream academia, science, and the general community of professionals—let’s face it, decades of Sci-fi, UFO lore, fantasy, kooky spirituality, association with the paranormal, bogus psychics and other Charlatans as well as Hoaxers and government counterintelligence tricksters has turned the subject matter into a joke-of-sorts—an otherwise very serious subject is seen by the non-expert or non-professional community as a mecca for laughter, derision and ridicule. The CIA’s Robertson Panel had to be educated to this very fact in the 1950s—top minds just couldn’t believe the US government took the UFO subject seriously!⁸ Yet in spite of these and others problems, I found a way to overcome them all in the CLE design using CBM and other tools. Put another way, I cracked the Disclosure code—I found a way to get the whole world to open its mind!

And perhaps more importantly, I found a way to prove, beyond all doubts (to the entire world), the validity of ET/EFO/Cosmic Life Realty—to ensure the entire planet learns the facts. It took an incredible amount of hard work but the CLE evolved into a mega-global event design with every component carefully engineered to create a powerful synergy that leverages results.

A key part of my motivation for the CLE also came from my earnest desire to give back to the hard-working professionals of Ufology—I could not thank so many personally any more than I could thank individual rain drops for helping water the farm’s crops—but I could try to reward them with an industry-wide Bonanza that gave them the benefits they collectively sought.⁹

Sci-fi Is Now Becoming Reality

We all remember “Star Trek” Sci-fi fantasy but now “worm drives” and “impulse engines” (at least the principals and know-how to build them) are finally here and humans could be visiting their first exoplanet within 2-decades. We’re expected to set up our first Mar’s Base Camp in 2028.¹⁰ Most of the world has never heard of superluminal flight (flying above the speed of light barrier proposed by Einstein) but would be very surprised to know top minds are working on the problem as we speak—remember, the experts said the sound barrier was impossible to break too.

Recent scientific experiments have resulted in moving theoretical concepts of worm drives and impulse engines to the tables of applied science and technology. We are developing these tools and capabilities for humankind’s future right now. However, the

⁸ This is documented across many sources so I will skip them and simply refer the reader to: Report of Meetings of Scientific Advisory Panel on Unidentified Flying Objects Convened by Office of Scientific Intelligence, CIA (Jan 14-18),” CIA Archives (taken Oct 5, 2017). At: <https://www.cia.gov/library/readingroom/docs/CIA-RDP79B00752A000300100010-4.pdf>

⁹ The DTS trilogy relies on the research efforts over thousands of authors and other researchers whose works were need to ferret out a reasonable illustrative history of the UFO from WWII to 1954 (the trilogy’s focus area).

¹⁰ Lockheed Martin IAC, “Mars Basecamp Planery,” Australia’s Science Channel. At: <https://twitter.com/PatriotOrg/status/915606722504355841>

point is that if humankind can achieve such a level of know-how in just a few hundred years of relative industrialization and technological advancements, then any civilization in the cosmos with a few million years head-start can do it too. Therefore, given the mainstream consensus that there are hundreds of billions of inhabitable planets in our galaxy alone, and that hundreds of millions are likely hosting civilizations over a million years older than ours, is it so unreasonable to suggest just one cosmic race might have created a “worm drive” and visited Earth already?

The problem is most of us who work on, or study, or research these things are familiar with these questions and realities but most of the world is not—the CLE’s purpose is to fix that—to educate humanity, bring them up to speed—and it needs your help to do it!

Team Effort With Individual & Global Payoffs

The CLE project is seeking to be advised by, or hire, or consult with many of you. Do you have something we should consider or special original evidence we should review? Fine, let us know and we may pay you for your efforts or works. Want to go to the international CLE Symposium as a speaker or purveyor? Fine, let us know and we will guide you through that process to try and ensure your success. We can also help you build presentations or videos for CLE audiences around the world. Do you want to promote or fund space technology and related aspects and want to get involved—excellent, let me know and we’ll work together on it as part of the Cosmic Sciences International mission (the official sponsor of the CLE). Want to recommend someone of high integrity and an open mind for our Blue-Ribbon scientific, technology and expert panel or legal staff—also great, drop us a line (*there is form at the end of the document you can print, fill out and mail us*). Yet such tangibles are just the beginning of the CLE’s benefits.

Post CLE Disclosure, expect to see once prohibited areas of research and study funding blossom into abundance. Expect a global consumer rush for old and new works by authors, experts and anyone working on ET/EFO/Cosmic Life subject matters as the public demands more details and turns to existing works globally. Instead of selling a few hundred books or videos, etc., purveyors may find many thousands flying off the shelves. Speaking engagements and rates may jump markedly. Yet this is only a fraction of CLE’s projected benefits.

Still, the project is not really about helping any one of us, it is about helping big projects and humanity and our Earth. Our Post-Disclosure world, having been carefully engineered to be enthusiastically uplifting, will drive industries of every nature to gradually shift priorities as they embrace the new Cosmic Life Reality. We will unleash an incredible store of benefits:

[Disclosure] cannot be appreciated fully, however, without also appreciating a central fact of the past 50 years of UFO/ETI secrecy: that covert human projects have possessed advanced extraterrestrial technologies and have been “reverse-engineering” them for decades. This means that in the post-disclosure era, there will be the opportunity to eventually apply these technologies to the problems of human society. The elaboration of the mechanisms of advanced energy, propulsion, communications and other extraterrestrial technologies will have an extraordinary impact on current earth technologies, including energy generation, transportation,

*communications, education, manufacturing, medicine and more. Aside from our science, physics, mathematics and technology textbooks being rewritten, the practical applications of these technologies will completely transform the face of human society.*¹¹ —Steven M. Greer, M.D

Based on my own research, I must concur with Dr. Greer's assessments—in fact, I'd say he is understating the benefits and value of a Post Disclosure Earth. It is important humankind start to assimilate this knowledge and push it to the forefront of human endeavors, which is why it is a part of the mission and make-up of the CSI/CLE and its carefully crafted design.

Benefits? This project is expected to outcrop vital assistance to more than the following sectors:¹²

Space Exploration	Education	Science
Communications	Aerospace	Technology
Medicine	Energy/Alt Energy	Transportation
Cultural Arts/Entertainment	Manufacturing	History
Anthropology	Publishing	Travel
Agriculture	Mining	Geoscience
Computing	Construction	Waste Management
Environment	Sustainable Oceans	Wildlife Protection

And best of all, as governments release millions of pages of once classified "ET/EFO/Cosmic Life related materials", many researchers and writers will need to get into high gear and create new works that help peers and consumers make sense of it all—new insights to science may be revealed—new propulsion and shielding concepts—things unimaginable may be revealed for exponential pay-offs! And you are sitting at the forefront of it all—you are now a part of humanity's enlightenment team so enjoy your status and do us all proud!

And Please Have Patience and See The Big Picture...

One of the pitfalls of working on a subject matter for decades is over-familiarity—an expert tends to overlook the fact most people do not know what they have already confirmed (but, happily, some do). For the benefit of those who do not know yet, those who do need to be patient and realize the CLE is aimed at the general global public, public governments and all

¹¹ Dr. Steven M. Greer has provided briefings for senior members of government, military, and intelligence operations in the U.S. and around the world, including senior CIA officials, Joint Chiefs of Staff, White House staff, senior members of Congress and congressional committees, senior United Nations leadership and diplomats, senior military officials in the United Kingdom and Europe and cabinet-level members of the Japanese government, among others. He is a lifetime member of Alpha Omega Alpha, the nation's most prestigious medical honor society as well as an emergency physician and former chairman of emergency medicine at Caldwell Memorial Hospital. Dr. Greer is widely regarded as the world's foremost authority on the subject of extraterrestrial intelligence.

¹² The list of projected benefits disclosed in Dr. Greer's statement have been confirmed by many government insiders, focus area research professionals, authors, journalists and others throughout the years; such statements are only surprising to those outside professional subject area ranks (i.e. general public, mainstream science, academia, etc.).

types of funders, not insiders and experts. This project is about promoting science and exploration of the living cosmos to plant the Giant's bean-stalk-seeds that will literally grow right up into the stars!

Global Statistics & Polls^{13 14}

Many in the US and around the world are now calling for an end to ET/EFO/Cosmic Life Realty ridicule and secrecy, demanding governments disclose what they know.¹⁵ The statistics prove the public is already well prepared for Disclosure so the CLE is but a ceremonial formality now.

Drilling down into some interesting findings, a 2015 poll reported 72% of people in the UK said we are not alone in the universe while 1/3 believe the government is hiding knowledge about EFOs.¹⁶ Germans came in at 57%¹⁷ and Canadians at 78%¹⁸ in support for the existence of cosmic life. National Geographic study revealed 77% of Americans believe world signs show intelligent extraterrestrials have already visited Earth.¹⁹ Gallup Polls taken between 1966 and 1987 showed an average of 63% of Americans considered EFOs real²⁰ and 80% believe the government is hiding the existence of extraterrestrial life forms.^{21 22}

Impulse Engines

Presented at the NASA Breakthrough Propulsion Physics Workshop, Cleveland, Ohio, August 12-14, 1997 At: <https://physics.fullerton.edu/~jimw/nasa-pap/>

*Aerospace propulsion technology to date has rested firmly on simple applications of the reaction principle: creating motion by expelling propellant mass from a vehicle. We can do better. A peculiar, overlooked relativistic effect makes it possible to induce large, transient rest mass fluctuations in electrical circuit components [Woodward, 1990; 1992]. Such fluctuations may be combined with a synchronized, pulsed thrust to greatly increase the acceleration attainable from a given amount of ejected reaction mass. A yet more innovative implementation of the effect suggests **it may be possible to make engines that accelerate without the expulsion of any material whatsoever. These "impulse engines" are achieved without any moving parts (in the conventional sense). The concepts involved are supported by experimental results already in hand.** Moreover, due to the nonlinearity of the effect, Morris and Thorne's [1988] **traversable wormholes** and Alcubierre's [1994] **"warp drive"** may be attainable with known technology (while remaining fully in line with the established laws of physics, despite their "Star Trek" nature)....*

*James F. Woodward
Departments of History and Physics, Cal State University*

Over ½ billion people in India believe extraterrestrials (aliens) walk among us.²³

Reuters (April 8, 2010) At: <https://www.reuters.com/article/us-aliens-odd/they-walk-among-us-1-in-5-believe-in-aliens-idUSTRE6374B220100408> ALSO "India Population," Worldmeters (taken Oct 5, 2017) At: <http://www.worldometers.info/world-population/india-population/>

In China, the EFO reality is seen as a very serious, open subject by citizens, government and especially scientists.²⁴ According to *Pravada*, an estimated 700 million people in China believe in EFOs.²⁵ Over 400,000 Chinese subscribe to a magazine aimed at serious EFO research.²⁶

Studies around the world consistently indicate over 50% of Earth's inhabitants believe EFOs are real in spite of what governments have proclaimed.²⁷ Polling and survey extrapolations suggest an estimated 3.7 billion people on Earth appear to believe in the EFO reality while roughly 370 million claimed to have actually witnessed one.^{28 29 30 31} Therefore, it is safe to say the majority of Earth's inhabitants view the EFO as a universal reality — disbelievers are in the minority now! The CLE will merely reinforce what most of the global public already knows and it will help convince the remaining minority.

So How Are We Achieving Disclosure!

Three things cannot be long hidden: the sun, the moon, and the truth. — Buddha

Our extraordinary, high profile, global project begins by asking three simple questions of the world as well as an international Blue-Ribbon panel of scientists and experts:

1. Does Basic Cosmic Life Exist?
2. Is There Intelligent Life In Our Cosmos?
3. Has Intelligent Cosmic Life Visited Earth?

²⁴ The New York Times, "U.F.O. Boom Doesn't Worry China's Rulers" (re-published by) UFO Evidence (Jan 11, 2000). At: <http://ufoevidence.org/documents/doc433.htm>

²⁸ "Public Opinion Polls on UFOs," UFO Evidence (taken Jan 21, 2017). At: <http://www.ufoevidence.org/topics/publicopinionpolls.htm> (Note: calculations are based on a wide collection of respectable polling that consistently mirrors historical polling conducted around the globe [the 50% figure used for the global population is within in the margin of error across the collection of polls, timeframes and countries polled].

²⁹ Extrapolated confirmations—Using a variety of UFO sighting statistics as well as UFO audience surveys, an estimated 10% (likely under 5%) of those witnessing a UFO actually bother to report their sightings officially; this equates to an average of 90% of all sightings world-wide going unreported and un-tabulated. If we use 370 million witness baseline (for official sightings reported), then as many as 3+ billion people have probably witnessed a UFO. Next, if we assume 80% of all those sightings can be explained conventionally, we are left with about ¾ billion people on the planet that may have actually seen an EFO and have many unanswered questions—answers of which, in part, can be found by watching our trilogy and the CLE. ALSO see: Friedman, Stanton, "Flying Saucers and Science," New Page Books, NJ (2008), Chp 1 and Chp 8 for further documentation of the "less than 10% of sightings being reported."

³⁰ "Canadian UFO Poll: 3 million Canadians have seen UFOs" Ufology Research of Manitoba (October 15, 1997) (reprinted by UFO Case Book (taken 4-29-17). At: <http://www.ufoevidence.org/documents/doc996.htm>

³¹ "Canadian UFO Poll: 3 million Canadians have seen UFOs" Ufology Research of Manitoba (October 15, 1997) (reprinted by UFO Case Book (taken 4-29-17). At: <http://www.ufoevidence.org/documents/doc996.htm>

These questions will be asked and answered scientifically, technologically³², evidentially, factually and per federal law standards (e.g. rules, trial law, etc.) presented on “live” global television, satellite, mobile and Internet across 70+ countries with over ½ billion viewers—a true history making event!³³

The stunning answers will be celebrated by the great pillars of our societies during the grand unveiling event—the CLE World Concert (held in 10 major global cities) and the crowning Earth Gala (held in the United States)³⁴—a LIVE TV extravaganza featuring world dignitaries, royalty, movie stars and celebrities, VIPs of industry, science, education, philanthropy and others of high status and position—all collectively lighting humanity’s way, demonstrating how the world should accept and act under the new Cosmic Life Reality and paradigm shift!

Remember, it is not currently vital to success as to what anyone personally believes to be true, but what is actually true. The reality is thousands of contractors, experts and people across governments of the world have already confirmed the answers to the 3-Primary Questions is “YES!” Some of those people may be disclosing what they know with respect to the answers! We could even see government officials from countries such as France, China, Brail, Italy, USA, Germany, New Zealand, Belgium, Russia, Australia and more officially participate in the event and release stunning new facts once hidden from the world.³⁵ Yet regardless officialdom’s participation or not, the project will already be providing all the evidence needed to ensure the same “YES” verdicts for a so called “Soft Disclosure.”³⁶

Once the answers are officially disseminated to a global audience, Disclosure will be over and the next phase will begin. A plethora of Post Disclosure benefits will then be reaped by humanity, industry, education, exploration, science and far, far more.

Why is the CLE Needed?

History teaches us that life always demands a decision, and when we fail to choose our own destiny, the universe chooses for us.

³² Technological analysis is done by experts on cases when science concludes the phenomena is not natural but manufactured. For example, experts might have to figure out if any conventional human craft can pull 50 Gs and stay intact (considering the period in question and state-of-the-art technology at the time of the event, facts, etc. and all known factors). In other words, the CLE is doing proper, professional, sound research and analysis and leaving no stone unturned—we want to give the Blue-Ribbon Panel every chance we can for a YES verdict with a transparent, above board process so everyone can see we had no tricks up our sleeve!

³³ The CLE is a partnership project between Cosmic Sciences International™ (nonprofit) and Imajilan™ (for-profit).

³⁴ Scheduling dates and locations are underway and will not be officially known until sometime in 2018.

³⁵ Remember the saying in the movie “Field of Dreams,” “build it and they will come?” We say “may” because once the CLE project has achieves critical mass, world governments will take notice and may conduct internal studies to see if they should participate—some could change their mind at the last hour.

³⁶ The subject industry nomenclature or jargon “Disclosure” is defined as “an event that officially reveals to humanity the existence of, and aspects of, intelligent extraterrestrial life that was previously hidden under “top secret” classification by government/s. It often implies official government disclosure (it does not include nominal scientific discoveries, such as NASA verifying microbial life on Mars). “Soft Disclosure” is the term used to describe a private industry form of disclosure that reveals the facts and provides absolute proof of intelligent ET yet gives governments flexibly (they can gauge the public’s response and use various tools to modulate negative impacts, if any, or they can support a well-accepted Soft Disclosure with officially sanctioned disclosure). It will be difficult for any government to maintain secrecy post CLE—nobody will believe them, hence trust them—they are better off joining in!

Some governments are finding the cost of maintaining ET secrecy to be prohibitive as well as risky. “Classified leaks” are becoming more prevalent globally. Then there is the specter of a forced “X Disclosure Event” whereby cosmic life itself shocks the world into a new reality by accident or force. These types of “uncontrolled disclosure events” can foster public panic and cause adverse impacts on societies to disrupt markets, industries and more. Yet governments like the United States, Australia, Belgium and others, including world organizations like the United Nations, continue to “roll the dice with world stability and potential chaos” and avoid Disclosure instead of engineering a positively charged approach—it’s time to remedy that!

How do we know disclosure can be done safely, even if “positively” positioned?

As NASA’s Norman R. Bergrun reminds us in “Ringmakers of Saturn,” ET has been with us Earthlings for thousands of years and we are, after all, still here so why worry! ³⁷ Yet doomsday disclosures have been demonstrated several times in world history without ill impact. The first time was WWII and the Atomic Age revelation when humans learned they could be instantly annihilated! Publics did not flinch, let alone panic. The second event occurred in June 1947 when a businessman told the world about witnessing flying saucers (that had to be alien in nature). The news covered the story world-wide yet nobody on the globe flinched! Other “world ending” events also failed to cause panic (i.e. Ebola and HIV/AIDS outbreaks, Chernobyl and Fukushima nuclear meltdowns, and so on). When told properly, humans adapt!

The problem is the ET issue was known and installed underground by the US military in WWII. The Cold War’s “Shadow Government” then conducted psychological warfare tactics on the American people and our enemies in order to heighten the fantasy and ridicule factor as well as the perceived threat of ET toward maintaining “classified secrets.” In other words, in hiding the ET reality, the government elevated the public fear-and-laugh factor surrounding it so that the whole subject, once taken in stride by world citizens, now seems more kooky or ominous and nefarious—a world view completely manufactured by the government itself and one that the government now seems powerless to remedy. — Cosmic Paradigm Shift

The CLE removes baseless fear with a theme of revelation and celebration. Private industry, being far more skilled at creating “positively charged nonprofit and for-profit events,” also helps remove the disclosure burden from government to create a “social safety valve.”³⁸

What if the Verdicts Are All “No”!

Let’s pause and assume we fail to bring in an official Disclosure verdict of 3-Yeses! Now what? In a worst-case scenario, we still win! In addition to being highly educational, entertaining and riveting for audiences, the CLE offers a greater social and cultural outcrop—it moves the public awareness needle to the edge of the Cosmic Life Reality goal line. By using a global media extravaganza with carefully constructed and choreographed components, an international mood of fun, glamour, excitement, and celebration are forwarded that omits any heavy or ominous tones—world cultures are thus more likely to instantly accept and adopt the cosmic

³⁷ Norman R. Bergrun, Norman R., “Ringmakers of Saturn,” The Pentland Press Ltd (1986), p.29-133, Reprinted At: http://podcast.sjrdesign.net/files/070_RingmakersOfSaturn.pdf

³⁸ Governments can judge the public’s response and either support disclosure or again deny it.

paradigm shift and the new ET reality even without an official “YES” verdict. Additionally, governments, having witnessed the upbeat public reactions, will be moved much closer to Disclosure—so even if we get THREE NOs, we should ultimately achieve the mission.

Healthy Versus Obsessed Skepticism

I respect careful skepticism but not the obsessed fanatic or skeptic.³⁹ We see them in every camp—the hard core or fringe who see aliens everywhere or tin-foil hatters or the jaded skeptics—the type who could be beamed up by ET and would still not admit they were wrong! I have already faced some less than professional Ufologist and Ancient Alien Theorists who think my approach to the CLE will automatically lead to “bogus” results—that scientists and other experts cannot be trusted to come to the table with anything but a predetermined view that shoots everything down automatically—the so called “Edward Condon Effect.” However, this is not even close to sound thinking—I know experts who have an open mind but need a platform where they can safely apply their talents to the questions and not face peer or industry ridicule or derision—and I am going to do my best to give them that platform. I don’t gamble.

First, this project is set-up specifically to enhance prestige, not harm it—think of it like Disney meets Harvard with a dash of Comic-Con for fun and Red-Carpet Hollywood for glamour—the world’s top personalities on display in their finery—top government leaders rubbing elbows with them. It doesn’t get much more prestigious than that! What scientist or expert doesn’t need a high-profile feather in their cap—everybody in their professional network will envy the hell out of them for getting access to world VIPs, stars, royalty, philanthropists and more!

Second, the CLE is set-up for healthy skeptics—in fact, the entire theme pushes healthy skepticism and sound judgment with a heaping of inspiration. This is because the CLE needs legitimate people to study the evidence, etc.—that is what gives the project its clout!

Third, the CLE is set on a platform and process that ensures professionalism, not politics, but an approach that fosters sound science, tech, legal rules, study and analysis, not pseudo-science and fakery—we want the evidence questioned and scrutinized because the Panel are, in a way, representing the Global Public Skeptic. The CLE opposes cheerleaders, fantasy, wild ass theorists or those who drivel hogwash. The CLE relishes fact finding, expert professionalism, the scientific method, expert technical analysis, the federal law and common-sense methods. The CLE wins its respect by ensuring only serious study is done properly and on behalf of the entire planet—not by people who lack the proper credentials but by true experts—the CLE wants the Panel to properly evaluate the planet’s current evidence, cases, etc. and see if it good enough to pass muster—let the cards fall where they may! We win either way!!!

Now, so I do not scare off any supporters seeking 3 “Yeses,” please realize I was smart enough to research the hurdles faced by the CLE and that is why I am so confident the Panel will end up there on their own accord. All we need is for the top pros to lend us a hand with the top evidence and cases, etc. to ensure success—hence expect the “Yeses” applauded globally!

Cosmic Life Exposé™ (CLE)

Our cosmos is filled with life and some of that life is coming to Earth. —Zelan Bonn

Global Television / Satellite / Mobile / Internet = 70+ Countries / ½ Billion Viewers						
						
Global Media	Law	Science	Learning		Planetary Celebration	
World dignitaries, royalty, movie stars and celebrities, VIPs of industry, science, education, philanthropy and more celebrating the new cosmic life revelation! COSMICLIFE.world						

The CLE infuses news, education, Reality TV, “live” music and VIP Gala into a global entertainment showcase to create a unique, Mega-Size Disclosure Event.⁴⁰ It radiates wonderment and an upbeat, celebratory theme that incorporates VIP role models demonstrating how societies should respond to the new Cosmic Life Reality. The project takes the global public down the post-disclosure road and exposes the expected benefits anticipated for all of humankind—it encourages a world future filled to the brim with hope!

The project is painstakingly designed using an amalgamation of disciplines and innovations that include cultural-bias marketing, public relations, spectrum transmedia content fusion, advertising, contests, communications, entertainment, news, telecommunications, social media, and distributed and coordinated broadcasting across television, satellite, Internet and mobile and far more.⁴¹

Advancing & Promoting Cosmic Science & Tech Pay-offs!

Additionally, because the CLE utilizes a Blue-Ribbon panel of experts, including scientists, it repaints the entire ET subject afresh with respectability—a patina of legitimacy so long missing from the industry that it has hindered professional science and expert investigation and study.⁴² We will see governments rethink once prohibited areas of investigation and fund new studies after the CLE has helped remove outmoded stigmas and advance the subject as worthy of legitimate endeavor and resources!⁴³

⁴⁰ Specific details of the CLE project, schedule, shows, and event locations is proprietary for the time being.

⁴¹ CLE is independently produced by Imajilan™ and is not part of the traditional TV network system in USA.

⁴² The CLE is presented strictly from a professional corporate media approach—no kooky Sci-fi or fantasy elements or images, etc. are in any of its marketing, advertising, content or other aspects (save the Symposium where uncensored fun is allowed by all purveyors—yet the Symposium is subject to our TV cameras only as well as our spokespersons so that content and CLE Theme and tasteful depictions are ensured throughout the event).

⁴³ Scores of scientists and disciplinary experts want to work in this field but are being prevented by cancerous Dark Age cultures that frown on such endeavors. This is largely due to past government-manufactured “ridicule factors.”

Remember, the CLE seeks to hire the very best and does not ask them to do anything but legitimate investigation and study—nothing more! The CLE’s role is as facilitator, charged with bringing experts first-in-class cases, facts, documents, witnesses and other forms of proof (most already vetted by professionals). In short, the CLE seeks to give the impartial experts the very best evidence available. If the experts proclaim the collection of evidence is valid proof of the ET/EFO/Cosmic Life Reality, then Soft Disclosure is affected! Keep in mind a final YES or NO verdict is acceptable under the CLE’s Impartiality Rules.

Lastly, I have studied the failings of past Disclosure attempts. They often get too far off topic or delve into strangeness, lack proper authority or use restrictive, fee-based viewership models—too few people hear from the experts so their efforts fail goals and objectives. Alternatively, the CLE is strictly focused on the 3-Primary Questions, provides respected and authoritative experts from traditionally honored disciplines, and best of all provides FREE VIEWER ACCESS WORLDWIDE—we may reach as many as 1 billion viewers. This means that complete Disclosure failure still results in very strong public awareness and education success!

A Word About The CLE Symposium

The theme of the CLE Symposium is all things related to Cosmic Life—in other words, this is the one part of the whole project where “we let our hair down”: alternative energy, all manner of research and study, pioneering technology, theoretical and applied sciences, space exploration activities, radio astronomy, experts of every nature, professional authors and investigators across the Ufology⁴⁴ spectrum and so on. The idea is to ensure global coverage, knowledge and perspectives encouraging all manner of discourse on the Cosmic Life equations, humanity and Earth and to give the public an opportunity to engage, learn and enjoy.

Science, Law and Technology Assessment

The CLE seeks to cover all bases in answer the 3 Primary Questions. Many folks misunderstand the role of science with respect to the study and verification of ET and especially EFOs. Science is largely concerned with studying natural phenomena. For example, a strange light in the sky with no known explanation first falls under the discipline of scientific investigation. Once science conducts its investigation and concludes the light is not a product of “nature,” its work is largely done. The next phase of study is then conducted by Intelligence & Technical Analysis operations (whether civilian, government or military). Their respective job is to assess all aspects of the lighted object by gathering as much data as possible to make formal analysis and study conclusions (to the extent possible). For example, if the lighted object can perform flight operations exceeding all known (and top-secret technology) on Earth, then the object can be officially classified as “non-human” technology. It is also commonly said in the UFO community that “we could convict the UFO as both real and extraterrestrial in a court of law many times” over so the CLE is providing that opportunity as well—top attorneys will represent both sides in a televised federal trial and a jury will bring in the final verdicts!

⁴⁴ Part of the CLE’s mission is to break-down old barriers and patterns of prejudice that have kept Ufology in the Dark Ages and otherwise repelled mainstream science and expert study and investigations.

The Official Evidence

The CLE has identified the evidence needed for the project's success. That said, it is my firm belief there is a cache of evidence all over the planet and the CLE must give it equal opportunity for potential Panel review. Therefore, if you or your peers or anyone has contributory proof of ET/EFOs/Cosmic Life Reality, then our open access forum allows it to be submitted. The CLE will do its best to properly vet and submit first in class evidence to the Panel. Any original materials loaned to the CLE are insured and kept under tight, armed security.⁴⁵ Therefore, given an entire planet's worth of evidence, cases and witnesses and everybody having access to provide such evidence to the CLE, the crème de la crème of evidence should be going to Panel for review—all the best cases available—then let the verdicts be declared as they may!

Please Lend Me Your Support!

The CLE seeks to overwhelm the global public with a powerful, energizing, positive, fun message, series and event that ensures enthusiasm over baseless fear. Its overall theme is of revelation and celebration! I am asking for your support even if you do not believe in the project⁴⁶—what do you have to lose—if CLE succeeds, consider what Earth and Humanity gain! At the very least, we ensure a vital, globally benign response to a possible “X Disclosure Event”.

The CLE will allow us all to step into a universe of greater understanding where we realize humanity is but a drop in the unending multiverse of life where incredible adventures, people and learning await us all! There is a Dark Ocean out there and it is humankind's destiny to sail its boundless seas and enjoy the fruits of exploration and new worlds. Yet the first step to understanding the value of venturing into mysterious realms must be taken in our own world—it's called Disclosure—humanity's assimilated understanding that our cosmos is filled with intelligent life—our collective epiphany, that final step in the odyssey from the Age of Frightened, Superstitious Apes into the Epoch of the Enlightened, Cosmic Humanbeing—for it is well time us Earthlings grow up!

Please lend the CLE a hand by spreading the word, donating, patronizing, granting, participating and doing what you can to assure the CLE's fruition for Humanity-Earth!

My Deepest Appreciation and Thanks To You All!

Zelan Bonn, MBA⁴⁷

Producer and CEO, Imajilan[™]

Creator, Cosmic Life Exposé[™]

⁴⁵ All cases, evidence, etc. are screened using a preset criterion prepared by the Panelists or technologists or law experts—the screeners will seek out the very best cases to submit to ensure every chance for success.

⁴⁶ Support is also a key buffer against blow-back from folks seeking to sabotage our efforts for various reasons. A strong blanket of community support helps insulate us from all such attacks!

⁴⁷ PS--FOR THE RECORD—I'm reasonably healthy and not suicidal and the CLE evidence, witnesses, and plans etc. have been distributed to many others who will take up the mantle should I suddenly vanish! The project is not going away even if I do!

This form is used for our internal purposes only. We do not share your information without permission.

Name _____ E-Mail _____ Phone: _____
Entity _____ I/We wish to support the Cosmic Life Exposé™ (CLE).

CSI/CLE **MAY** **MAY NOT** publicly associate **Me** **Named Entity** as an official supporter.

I/We request: Phone call Meeting with Mr Vanderschuit Mr Bonn (10am to 2pm) on: T/W/Th

I/We wish to Attend (circle all that apply): **1) CLE Charity Dinner 2) Earth Gala 3) World Concert.** Seats ____.

Enclosed is a **donation check made PAYABLE TO: Cosmic Sciences International** (to be set up as a 501c3 nonprofit). The funds are to be used by CSI as needed for the Cosmic Life Exposé™ project. I/We acknowledge the donation is **NOT YET TAX DEDUCTIBLE** until Cosmic Sciences International receives its official State and IRS tax exempt status and notifies me/us in writing. _____ Initials.⁴⁸ My/Our donation check is enclosed: \$_____. [CSI to notify me/us if/when tax exemption is approved.]

I/We require a tax write-off. **I/We pledge a donation** of \$_____ once Cosmic Sciences International receives its official State and IRS tax exemption status and notifies me/us in writing.

I/We wish to offer assistance to the non-profit side of the project as: **Volunteer** **Paid:**

Board Mem Consultant Exec Blue-Ribbon Panelist Legal Team Evidence/Witness

Subject-Matter Expert Management Staff PR/Spokesperson Content/Vid-Archive Supplier

Fundraiser Website Net/Social Media My/Our Contacts Other (explain: use back or attach sheet).

This SURVEY SECTION is ONLY for those considering a relationship with the "for-profit" side.

I/We acknowledge You are **NOT** soliciting investment funds and You have **NO** obligation to issue investment opportunities. You Acknowledge I/We have no obligation to participate or invest in any way. By filling out and returning this form to CSI, **I/We VERIFY we have NOT enclosed any investment funds.**

I/We **ARE** **ARE NOT** an ACCREDITED INVESTOR/S.⁴⁹ I/We would like to request more information on any possible future private placement opportunities of the Cosmic Life Exposé™ project. I/We will consider a minimum participation of \$_____ and maximum of \$_____.

I/We wish to offer assistance to the for-profit side of the project as: **Volunteer** **Paid:**

Board Mem Consultant Exec Tech/Bus Advisor Staff PR. **I/We are interested in:**
